/note="Vector: pSPORT1 (Invitrogen); Site 1: Sal1; Site_2: Not1; Mouse cDNA project by the Laboratory of Genetics, National Institute on Adding (NIA), Intramural Research Program, NIH (http://lgsun.grc.nia.nih.gov/cDNA). This is a long-transcript enriched cDNA library (Ref. Genome Res. 11: 153-1558 (2001). [PMID: 11544199]). Total RNAS were extracted from a pool of 13 embryos at 8:5-days postcoitum. Double-extranded cDNAS were synthesized with an Oligo(dT) primer [Invitrogen: 5-Gays postcoitum. Double-extranded cDNAS were synthesized with an Oligo(dT) primer [Invitrogen: 5-Gays postrogrammer [Invitrogen: 5-Gays postrogrammer [Invitrogen: 5-Gays postrogrammer [Invitrogen: 5-Gays portion of 10 of total RNA, treated with T4 DNA polymerase, and purified by ethanol-precipitation. The cDNAS were ligated to Long-linker LL-Sal4, purified by phenol/chloroform, and separated from free linkers by Centricon 100. Then, the conna were purified by long-range high fidelity PCR using Ex Taq polymerase (Takara) with a primer Sal4-S. The products were purified by phenol/chloroform and Centricon 100. The cDNAS were digested with Sal1 and NotI enzymes and cloned into Sal1/NotI site of pSPORTI plasmid vector. The DHADB & coli host was transformed with the ligation mixture by the standard chemical method. The average insert size is about 2.5 kb. The library was constructed by Yulan Piao (NIA)."

polylinker; lst strand cDNA was prepared from mammary
gland tissue from a lactating female, and was then primed
with a Not I - oligo(dT) primer. Double-stranded cDNA was
ligated to Eco RI adaptors (Pharmacia), digested with Not
I and cloned into the Not I and Eco RI sites of the
modified pT713 vector. Library is normalized. Library
was constructed by Bento Soares and M. Fatima Bonaldo."

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 209, 1
